[Portfolio](#)

Addis Ababa, Ethiopia

Professional Summary

Results-driven Mobile Software Engineer with 3+ years of experience specializing in cross-platform mobile development (React Native, Flutter) and full-stack solutions (Node.js, PostgreSQL). Proven track record of architecting secure, high-performance applications for enterprise Fintech systems, translating complex business logic into intuitive user experiences. Adept at full-lifecycle development, from robust API integration to sophisticated state management and performance optimization. Highly adaptable, remote-ready, and passionate about shipping reliable, scalable products that drive massive user engagement.

Work Experience

Mobile App Developer

March 2025 – Present

EagleLion System Technology

Addis Ababa, Ethiopia

- Spearheaded mobile frontend engineering for the **CBE SuperApp**, an enterprise-scale application for the Commercial Bank of Ethiopia (the country's largest bank), designed to securely handle high-volume transaction processing.
- Architected and deployed comprehensive financial modules from scratch, including sophisticated wallet management, loan services, budgeting tools, and virtual card management.
- Integrated robust payment gateways and IPS (Integrated Payment Systems) alongside in-app e-commerce and digital service offerings, transforming the app into a true super-app ecosystem.
- Built secure, real-time in-app chat functionalities and advanced notification systems to drive user engagement and streamline customer support.
- Ensured strict compliance with banking security standards through optimized session management, encrypted data flows (Node.js/REST), and elegant loading states for a seamless user experience.

Full Stack Developer

July 2023 – Feb 2024

Olla App Development

Addis Ababa, Ethiopia

- Built and maintained a production-grade, location-based lifestyle and restaurant discovery application using React Native.
- Engineered complex geolocation logic, distance filtering, and real-time data synchronization to deliver accurate, dynamic user interactions.
- Bridged the gap between mobile frontend and server-side logic, translating complex business requirements into highly functional, scalable code.
- Participated in agile code reviews, enforcing strict coding standards, modern architectural patterns, and rigorous performance optimization techniques.

Key Projects

Dashen Super App - Dashen Edl Feature

Role: Mobile Developer | **Technologies:** React Native, REST API

Gamified prize-winning feature integrated within the digital ecosystem of Dashen Bank, Ethiopia's third-largest commercial bank.

- Developed interactive and highly engaging mobile UI components for the "Dashen Edl" prize-winning game.
- Integrated secure backend APIs to handle real-time user participation, entry tracking, and reward distribution.
- Optimized animations and component rendering to ensure a smooth, lag-free experience across thousands of concurrent users.

EtSwitch Agency Banking Portal

Role: Frontend Developer | **Technologies:** React, Node.js, REST API

Web-based fintech portal for managing agency banking operations and services.

- Built and enhanced React web portal features for agent management, transaction processing, and operational workflows.
- Optimized session management, reporting interfaces, and security protocols for sensitive financial data access.

Education

Bachelor of Science in Computer Science

September 2019 – July 2023

Unity University

Addis Ababa, Ethiopia

Technical Skills

Languages/Frameworks:	React Native, React, Flutter, TypeScript, JavaScript, Node.js, Express, Next.js, Python
Databases:	PostgreSQL, MySQL, MongoDB, Firebase Realtime Database
Tools & Architecture:	Git, Docker, CI/CD, Prisma, Webpack, Redux, Apple Xcode
Domain Expertise:	FinTech Architecture, Payment Gateway Integration, Secure Data Flows, RESTful APIs, Geolocation Logic

Certifications

- Advanced NodeJS: Level Up Your NodeJS Skill, 2024
- Full Stack Website Development, 2023
